

# Vet Visit Prep Sheet

Bring better notes: symptoms, timeline, food, medication, photos, questions, and follow-up instructions.

---

## Before the Visit

Appointment reason:

Main concern in one sentence:

When did it start?

What changed recently?

Photos/videos to show:

Stool/urine/appetite/water changes:

Known allergies or past reactions:

---

## Medication and Diet Notes

Current food and treats:

Supplements:

Prescription medications:

Dose and timing:

Missed doses:

Recent diet change:

Products used at home:

---

## Questions to Ask

What signs mean urgent recheck?

What should improve first, and by when?

How should medicine be given and stored?

Are there side effects to watch for?

When should I send an update?

---

## Important Boundary

For breathing trouble, collapse, suspected poisoning, severe pain, seizures, inability to urinate, major injury, or rapid decline, seek urgent veterinary help instead of waiting for a routine visit.

---

## Sources Used

AVMA veterinary visit and responsible pet ownership resources. This sheet is not medical diagnosis.
